

I looked at the vertebrate,
It had two wings, and two legs
Warmblooded and hard shelled eggs,
With feathers I know you're a bird

With penguins something's amiss,
Can't fly and swims like a fish,
But just look at this list,
Penguins are birds in every way

Call bats a bird—get scolded
Fur covered, no feathers showing
No eggs, live babies growing
Bats are not birds, all mammal, baby

Hey, I just met you,
And this is crazy,
But I see feathers,
So call me, birdie

But if you have hair,
Like a lady,
Then remember,
Call me mammal

Hey, I see fins flappin,
And gills are crazy,
But if I have scales,
Call me, fishy

If I am coldblooded,
Skin is slimy,
Tadpole beginning,
Call me Amphibian

We still need to reptiles recall,
They are vertebrates all
With dry scaly skin that falls,
Most of them lay some eggs

Snakes, turtles, lizards be real
No metamorphosis reveals,
Cold blooded so sun can heal,
When cold I hide away

If a salamander holdin,
Smooth slimy skin showin'
Baby gills turn to lungs blowin'
Salamanders are amphibians, baby

Hey, I just met you,
And this is crazy,
But I see feathers,
So call me, birdie

But if you have hair,
Like a lady,
Then remember,
To call me mammal

Hey, I see fins flappin,
And gills are crazy,
But if I have scales,
Call me, fishy

If I am cold blooded,
Skin is slimy
Tadpole beginning,
Call me Amphibian

Now lets look at ocean life
Whales have big lungs
Sharks have gill slits
Starfish neither, to bad

Now lets look at ocean life
Whales are mammals
Sharks are fishies
Starfish neither, to bad

Hey, I just met you,
And this is crazy,
But I see feathers,
So call me, birdie

But if you have hair,
Like a lady,
Then remember,
To call me mammal

Hey, I see fins flappin,
And gills are crazy,
But If I have scales,
Call me, fishy

Before I sang this song
My science was so bad
My science was so bad
My science was so, so bad

Before I sang this song
My science was so bad
And you should know that

So call us, vertebrates?
